**Principal:** Michelle M. Leader      **Assistant Principal:** Connie Fowlkes

Dear Families,

I wanted to share an update with you regarding our building. Recently, Building Services was removing an old chalkboard that was located in back of the stage. It has been on the stage for many years. While removing it, adhesive dots were observed. These can be indicators of asbestos so they were analyzed. It was determined from testing that there is asbestos in the dots. However, these have not posed any harmful effects to our students and staff.

A licensed asbestos contractor will be out to remove the adhesive dots tomorrow. A third party environmental consultant will monitor the project. If you have any questions, please contact the Office of the Environment at 410-313-6699.

Thank you,  
Michelle Leader
